WORK EXPERIENCE

Backend Developer, The Knowledge Academy

March 2025 - Present

- Currently focused on enhancing performance and code maintainability across multiple web platforms.
- Building and revamping robust backend systems for websites and portals using Laravel.

Web Developer Intern(Remote), Nuze Consultek LLP

Dec 2024 - Feb 2025

- Developed and maintained responsive web applications, implementing user-friendly designs and features.
- Integrated APIs and performed end-to-end testing using Postman to ensure seamless functionality.

MERN STACK INTERN, Solitaire Infosys

Jan 2024 -Jun 2024

- Developed and deployed a Full Stack Web App using the MERN stack, handling both Frontend & Backend independently. Implemented a robust Backend with efficient error handling, ensuring maintainable & scalable code.
- Used Git for version control, hosted the Frontend on Vercel, and deployed the Backend on Render, both integrated with GitHub.

Freelance Full Stack Developer

April 2024 -Present

- Developed and integrated APIs with CRUD operations and Google OAuth 2.0 login; optimized and refactored code, resolved bugs, built landing pages with debouncing, and created ZOD-validated database models.

PROJECTS

[Retrievia](#) [Live Link](#) [GitHub](#)

- Developed a frontend **RAG system** allowing users to upload PDFs, text, or URLs for or contextual summarization and question answering using **Next.js, TypeScript, and Generative AI**.
- Integrated **Qdrant vector database** for semantic search and built a real-time chatbot interface; frontend-only architecture stores ephemeral data cleared on page refresh.
